

## **Our Policy as Bericap Kapak San. A.Ş.;**

As Bericap Kapak San. A.Ş., we establish, implement and continually improve quality, environment, energy, occupational health and safety management systems for a sustainable future in the production of caps and handles for packaging.

For this purpose, we are committed to;

- Ensuring the production of products within the framework of the quality management system, in accordance with the customer's requirements, international and local regulations, using modern methods and techniques,
- Based on the principle of 100% food safety, completely eliminating physical, chemical and microbiological hazards while creating final products with the awareness of continual improvement,
- Ensuring product quality not after the production has been completed but during production, and in cases where the product quality is not up to the specifications, investigating the causes and working towards eliminating such causes,
- Making the cultural, technological, financial, administrative and information investments necessary for the company's present and future to strengthen its sustainability, and taking into account the environmental, energy, occupational health and safety aspects while making our decisions in the investment, design and supply phases,
- Based on a life cycle approach, systematically determining, evaluating the environmental aspects that may arise from our products, services and operations, keeping environmental impacts under control, and protecting the environment including the prevention of pollution,
- Complying with the legal regulations and international management system standards regarding quality, environment, energy, occupational health and safety, evaluating the needs and expectations of interested parties, determining the other requirements to be met and complying with these requirements,
- Aiming for using reusable, recoverable resources as much as possible, with the objective of minimizing all material, raw material and energy uses,
- Investigating the reuse of solid, liquid and gas wastes and recycling opportunities to minimize total waste in any condition and throughout all the divisions of our business, aiming for waste-free processes,
- Carrying out the selection and performance reviews of our suppliers and subcontractors in accordance with our management systems to ensure their improvement,
- Ensuring safe and healthy working conditions to prevent injuries and illnesses,
- Eliminating occupational health and safety hazards, and where this is not possible, taking the necessary measures to reduce occupational health and safety risks,
- Ensuring the participation of employees and consulting them,
- Continually improving the quality, environment, energy, occupational health and safety performance,
- Setting quality, environment, energy, occupational health and safety targets and planning the operations to achieve them, providing the necessary information and resources.

In addition to Bericap Kapak San. A.Ş. top management, it is the responsibility of all the leaders and employees to implement and ensure the implementation of this policy.
